Catalogue **2020**

Tools for the toughest demands

You can find all our new products on pages 2 and 3

Dear Festool customers,

whether you are working or enjoying your free time, there is one thing that you cannot do without: Your health. That is why we always make this the main focus when developing new products.

With our new TKS 80 bench-mounted circular saw, we are setting a new milestone when it comes to occupational health and safety. The integrated SawStop technology stops the saw blade in less than five milliseconds when it comes into contact with skin, consequently avoiding severe injuries.

We have also developed our catalogue with your requirements in mind. For example, you will now find our accessories listed right next to the product and an overview of the entire Festool system at a glance.

We hope you enjoy discovering our range.

New Festool products for 2020.

Your fingers – invaluable!

Safeguarding people's health is an important driving factor for the product designers at Festool. With the innovative SawStop technology in the new TKS 80 bench-mounted circular saw, severe injuries from cuts are a thing of the past. Upon coming into contact with skin, the saw blade stops within five milliseconds and disappears into the work surface. Sawing has never been safer.

Systainer³ combines workshop and construction site.

The familiar arrangement and compatibility of the Systainer system can now also be safely deployed in your vehicle. Thanks to the special holder, Systainer³ units can be directly integrated into Bott vehicle equipment. Safer and more mobile than ever – from the workshop to the construction site.

>> Page 316

Full power at a low weight.

In order to ensure that work is as non-fatiguing as possible, the Li-HighPower Compact battery has a reduced weight, with no detriment to performance. Thanks to the Li-HighPower cell technology, it is powerful enough for any application. With a weight of under 600 grams, it is both 20% lighter and 50% more compact than a 5.2 Ah standard battery pack.

>> Page 22

Greater precision at maximum performance.

With the StarlockMax tool holder along with sophisticated positioning and dust extraction accessories – the VECTURO OSC 18 is the intelligent system solution for the highest demands for performance, comfort and precision for dust-free sawing, scraping and cutting.

>> Page 80

The robust solution for cutting and grinding.

The AGC 18 cordless angle grinder is dust-resistant and durable thanks to the enclosed brushless EC-TEC motor and protected electronics. Its continuous adjustable speed from 4500 to 8500 rpm allows for cutting and grinding that is suitable for any material.

>> Page 302

For accurate separating cuts without dust.

The DSC-AGC 18 FH cordless freehand cutting system: Dust-free cutting of mineral materials. Thanks to the dust extraction attachment, more than 95% of the accruing dust is directly transported to the mobile dust extractor. The open design allows a clear view of the cutting line for easy orientation on the scribe mark.

Great results

Exact positioning without slipping, with depth stop and extraction adapter.

Ready.

For more relaxed sanding.

Perfect ergonomics is one of the key features that allows your tool to provide you with useful support in your daily routine – and not just when it comes to sawing, drilling and screwdriving. Like all Festool battery solutions, our sanding tools are ergonomically designed to ensure full freedom of movement and mobility.

Cordless eccentric sander ETSC 125

The compact ETSC 125 cordless eccentric sander with its ergonomic design and light weight of only 1.4 kg allows for effortless sanding in any situation.

Technical data	ETSC 125
Battery voltage (V)	18
Eccentric motion speed (RPM)	6.000 – 10.000
Sanding stroke (mm)	2
Interchangeable sanding pad dia. (mm)	125
Li-ion battery capacity (Ah)	3,1
Weight with Li-ion (kg)	1,4

You can find more information on page 94

Work without interruptions

Thanks to the **Bluetooth®** battery packs with 3.1 Ah capacity and a longer running time than charge time.

RUTSCHER cordless orbital sander RTSC 400

With a particularly compact and low design and a narrow 18 V Ergo battery pack, this is the right choice for small and narrow surfaces.

Technical data	RTSC 400
Battery voltage (V)	18
Idle engine speed (RPM)	6.000 – 10.000
Sanding stroke (mm)	2
Interchangeable sanding pad (mm)	80 x 130
Li-ion battery capacity (Ah)	3,1
Weight with Li-ion (kg)	1,4

You can find more information on page 102

Unique: With battery or cable

For all applications which require an even longer operating performance, the 18 V Bluetooth® Ergo battery pack can be replaced with the plug it-mains adapter (included in the set and available as an accessory). This alone creates a mains-powered machine with an unlimited running time in combination with the plug it-cable – ideal in conjunction with a Festool mobile dust extractor.

Cordless delta sander DTSC 400

Perfect for corners and edges. With the iron-shaped sanding pad, the DTSC cordless delta sander delivers the best sanding results even in tight spots. And the 18 V Bluetooth® Ergo battery pack in combination with the brushless EC-TEC motor provides plenty of power, similar to that of a mains-powered tool.

Technical data	DTSC 400
Battery voltage (V)	18
Idle engine speed (RPM)	6.000 – 10.000
Sanding stroke (mm)	2
Interchangeable sanding pad (mm)	100 x 150

You can find more information on page 208

Work progress thanks to magazine attachment

With the magazine attachment, you have one hand completely free to push plasterboard into position or work on ceilings, for example. The magazine can be dismantled in seconds without tools and cleaned quickly and easily.

Li-HighPower Compact battery pack: Full power at a low weight.

In order to ensure that work is as non-fatiguing as possible, the Li-HighPower Compact battery has a reduced weight, with no detriment to performance. Thanks to the Li-HighPower cell technology, it is powerful enough for any application. With a weight of under 600 grams, it is both 20% lighter and 50% more compact than a 5.2 Ah standard battery pack.

Fully reliable

Thanks to their high-current rechargeable cells, the Li-HighPower Compact batteries are extremely durable. And, naturally, they are fully covered by the comprehensive support provided by Festool Service.

Built-in convenience

The Bluetooth® version of the Li-HighPower battery pack safeguards your health, starting a connected mobile dust extractor automatically when the tool is switched on.

powerful all-rounder for all applications		the most efficient: For sawing and heavy-duty drilling and screwdriving applications	
For all tasks and 18 V tools – with a focus on performance and endurance. Can be used for sustained work with AGC 18, HKC 55, TSC 55, for example, as well as for particularly tough drilling and screwdriving applications with PDC 18/DRC 18.		For tasks for which power and extreme endurance are required – can be used for example for very long operating periods in combination with the TSC 55/HKC 55 plunge-cut saw or circular saw or the AGC 18 cordless angle grinder. Only available as an accessory.

Warranty all-inclusive.
Your plus in performance.**

Benefit from the comprehensive services provided by our all-inclusive warranty. When you register your new Festool tool, it is covered for the first years of use so you can concentrate on what really matters: your work.*

POWERSELECT

PowerSelect always provides you with exactly what you need for your battery system at any given time: For example, individual tools, battery packs and chargers.

Li-HighPower

NEW: HighPower Li-ion battery.
Noticeably lighter at full power.

In order to ensure that work is as non-fatiguing as possible, the Li-HighPower Compact battery has a reduced weight, with no detriment to performance. Thanks to the Li-HighPower cell technology, it is powerful enough for any application. With a weight of under 600 grams, it is both 20% lighter and 50% more compact than a 5.2 Ah standard battery pack.

AIRSTREAM.

18 V battery packs are quickly ready to use again: The battery packs with AIRSTREAM technology have an integrated cooling channel, which reduces the cooling time and therefore the entire charging process by up to 65 per cent.

Bluetooth® Dust-free working made easy.

With the Bluetooth® battery pack, the mobile dust extractor is automatically started up when the cordless tool is switched on. All 18 V battery packs are available with Bluetooth® technology – and are already included with delivery for many cordless tools.

* The offer for 'full repair, free of charge' does not apply for damage to consumables and accessories, misuse, damage caused by the use of non-original accessories or spare parts, nor in the case of tools which have been dismantled or subjected to constant, hard-wearing use. Wear parts are excluded.

** Warranty all-inclusive is valid for all Festool tools registered within 30 days of purchase. The Festool warranty terms and conditions shall apply and are available at www.festool.com/service. The service offer may differ according to country and importer.

Lightweight. Handy. Unbeatable profile-cutting capacity – even with a battery.

The CARVEX pendulum jigsaws.

Work comfortably in any position with the CARVEX. The machine operates at 3800 strokes per minute for inimitably powerful cutting strokes using an EC-TEC motor and unbeatable profile-cutting capacity. And it can be adapted to any situation you encounter while working. This is guaranteed by the varied range of accessories, including angle table, core maker, guide rail and various base runners.

Jigsaws

CARVEX PS 420

CARVEX PSB 420

The choice is yours: Guide the CARVEX PS 420 directly at the ergonomic knob handle, while the CARVEX PSB 420 has a handy D-handle. You decide based on your preferences – it makes no difference to the power, comfort or ergonomics of the tool.

Cordless pendulum jigsaws

CARVEX PSC 420

CARVEX PSBC 420

Our cordless versions: Work ergonomically without a cable – independently of the mains power supply and effortlessly in all application areas thanks to the 18 V battery pack.

Changes without using tools

Adapting to the working material is worth it. The results are more accurate and the saw blades last much longer. The Festool system is therefore designed to reduce set-up times, e.g. with single-handed saw blade changes without the need for additional equipment. In addition, benches and base runners can be changed without the need for additional equipment.

Optimum handling and operation

With a weight of only 1.9 kg, slim, ergonomic design, non-slip soft-grip coating and on/off switches mounted on both sides (also centrally on stirrup handle version) for right-handed and left-handed operation.

Precision cutting along the scribe mark

The stroboscopic light brings the saw blade to a visible stop, while dust extraction and the blowing function of the CARVEX keep the view of the scribe mark free.

Extremely versatile

Even the smallest circles (radii of 34 mm to 1.5 m) are easy to manufacture with the core maker and compatible jigsaw blade, e.g. the S 75/4 FSG.

Everything at hand. The accessories **SYSTAINER**.

Whether you are working with the various outsoles, core makers, angle table/adaptor table or replacement splinter guard – with the ZH-SYS-PS accessories Systainer, you will have everything you need to hand to make optimum use of your jigsaws in all of your applications. And this is stowed away neatly and compactly in the practical Systainer.

You can find more information on page 31

Our classic – tried and tested for universal use. The TRION pendulum jigsaws.

Thoroughly robust and powerful. The three-way saw blade guide with parallel adjustable carbide jaws guarantees precise cuts at accurate angles. You also save time: The simple yet effective splinter guard for splinter-free cuts and the tool-free FastFix saw blade quick-change system avoid the need for rework.

Pendulum jigsaw **TRION PS 300**

The PS 300 with knob handle is characterised by its excellent handling, e.g. during one-handed operation. The control elements are easy to reach in any situation. A perfect centre of gravity keeps the machine well balanced in any position.

Pendulum jigsaw **TRION PSB 300**

As the D-handle version of the PS 300, the PSB 300 boasts the same sophisticated features. This means that all users can select the handle shape that suits them best, according to their own personal preferences.

Powerful and consistently accurate

The three-way saw blade guide with parallel adjustable carbide jaws guarantees precise cuts at accurate angles. And, thanks to the simple swivelling function of the table, you can achieve mitre cuts with ease.

Rapid saw blade changes

The FastFix quick-clamping saw blade system saves you time and money without the use of additional tools. Sealing MIM technology (Metal Injection Moulding) and the fibre-reinforced quick-clamping lever guarantee lasting reliability.

Splinter-free cuts

The simple but effective splinter guard ensures splinter-free cuts and avoids time-consuming finishing work, even on veneered surfaces. Typical Festool: Precise right down to the smallest detail.

New versatility for perfect cuts.

Whether you require speed for straight cuts or precision in tight curves. In wood, plastic, building materials or metal. With cross-set or sanded teeth, a small or large pitch, made from HCS tool steel or carbide-tipped. No matter what you want to cut, a glance at the application overview of Festool's new range of jigsaw blades, will help you find the correct saw blade right away.

WOOD

Wood
For outstanding results in wooden materials with high-grade HCS tool steel.

PLASTICS

Plastic materials
Specially designed for excellent cutting results in virtually all plastics.

METAL

Metal
Rippled basic form made from HCS bimetal – ideal for machining metals such as aluminium and steel.

BUILDING MATERIALS

Building materials
Carbide-tipped for the longest service life even with abrasive materials.

Tips for setting the jigsaw correctly depending on the application.

Speed Control

High speeds in settings 4–6 are ideal for machining soft, temperature-resistant materials such as wood. Low speed settings of 1–3 are recommended for temperature-sensitive plastics such as acrylic glass or PET in order to avoid smearing and for metals and building materials in order to minimise jigsaw blade wear and the production of dust.

Pendulum stroke setting

A higher pendulum stroke makes it faster and easier for the jigsaw to work through the material, but it usually results in significant splintering. A low or deactivated pendulum stroke ensures low-splinter, accurate cuts at a low working speed and is therefore ideal for precise adjustment work and curved cuts.

Material	Saw blade	Application	Speed recommendation	Pendulum stroke recommendation
WOOD	Basic	For quick cuts in wood where high precision is not required.	4-6	
	Universal	The universal blade for perpendicular cuts fundamentally encompasses all relevant applications involving wood. Also ideal in combination with the Festool guide rail.	4-6	
	Straight Cut	For highly precise perpendicular cuts thanks to extremely sharp Japanese teeth – the fibres are firstly scored, then cut through cleanly.	4-6	Min. for high precision Max. for high speed
	Curves	Ideal for curves – even extremely tight radii are possible.	4-6	
	Fine Cut	For precisely cut and splinter-free surfaces.	4-6	
PLASTICS	Solid Materials	For the toughest demands such as plastic solid material and fibre-reinforced plastics.	1-3	
	Profile	For plastic profiles, acrylic glass (e.g. Plexiglas®) and soft plastics.	1-3	off
	Laminate	For laminate and boards bonded with melamine resin (e.g. Trespa®).	1-3	
METAL	Steel/Stainless Steel	For machining aluminium, non-ferrous metals and steel.	1-3	
	Sandwich Materials	For sandwich materials.	1-3	off
BUILDING MATERIALS	Abrasive Materials	For gypsum and cement-bonded chipboard and fibreboard.	1-3	
	Ceramics	For machining brickwork and ceramics.	1-3	Min. for high precision Max. for high speed
	Insulation	For soft insulating materials, cardboard and polystyrene.	1-3

For sawing precision.

The TS 55, TSC 55 and TS 75 plunge-cut saws.

High-quality working results

The guide rail guarantees clean, splinter-free cuts. The plunge-cut saw is fitted with guidance jaws that do not require tools to be adjusted, in order to enable the saw to operate with complete accuracy.

Perfect cut-outs

E.g. plunge cuts in kitchen worktops must be made precisely on the scribe mark. The transparent viewing window also allows a perfect view of the end markings, for example in corners.

Systems get it done

The plunge-cut saw system with guide rail and MFT multifunction table allows for a variety of applications both in the workshop and at assembly sites. You can securely apply and align your workpieces on the angle stop in order to machine them with precision.

Dust-free work

The adjustable intake manifold with Cleantec sleeve ensures that the suction hose is securely fitted in the tool. In combination with a Festool mobile dust extractor, the chips are sucked up at their source – providing a clean and healthy working environment.

For fast, precise cross-cutting.

The HK 55, HKC 55 and HK 85 portable circular saws.

Quick and precisely angled cuts

Click – and you're ready to go. The circular saws can easily be connected to the FSK cross cutting guide rail. In just a few steps, this produces a portable and easy-to-use compound mitre saw system. This makes it quick and easy for you to cut slats and boards to length.

All-rounders for woodworking

Cutting solid wood to length, joinery work, cutting of boards, square timber or planks – with the Festool circular saws in combination with the cross cutting guide rail, guide rail, parallel side fence or freehand, cuts can be made effortlessly.

Exceptional: HK 85 including groove router

Turn your HK 85 portable circular saw into a powerful groove router in an instant – with just a few steps and the adjustable groove cutter conversion kit, which is available separately. Ideal for longitudinal and transverse grooves, rafters and inserted ceilings.

More independence

For more mobility in timber construction: The cordless circular saw with FSK cross cutting guide rail demonstrates what construction sites today – with no need for sockets or cable pulling.

Maximum precision in sawing work – even with a battery.

The plunge-cut saws with 55 mm cutting depth.

The plunge-cut saws in combination with the guide rail allow for precise and exact cuts with no need for time-consuming follow-up work. Can be fitted with a viewing window or splinter guard, for even more control and perfect results. Or the expanded angle adjustment and dual display for cutting depth adjustment as a guarantee for even more precision and simple operation.

Plunge-cut saw TS 55

Precise plunge cuts in materials up to 55 mm thick. The cable variant.

Cordless plunge-cut saw TSC 55

Precise plunge cuts in materials up to 55 mm thick. The double-battery concept. With two 18 V battery packs (36 V) for maximum power and high-speed EC-TEC motor for perfect cutting quality and rapid working progress.

Brushless
EC-TEC motor

Splinter-free sawing on both sides
 With the clip-on splinter guard in combination with the guide rail it is even possible to saw on both sides without splinters. Advantage: No rework and considerably less workpiece waste.

Exact depth setting
 Easy to read and adjust: The dual cutting depth scale for working with or without a guide rail. With extra-large font and fine adjustment feature to perform accurate plunge cuts.

More safety, more comfort

The spring-loaded guide wedge runs in front of the saw blade to prevent it from jamming and makes it easier to insert the blade in existing joints.

FastFix saw blade changing system

Quick, one-handed and with no need for tools. Saves time and improves quality, because working with a material-specific saw blade goes without saying.

Convenient extraction.
With Bluetooth®.

The battery pack communicates via Bluetooth® with the Bluetooth® module of the CLEANTEC mobile dust extractor (can be retrofitted as an accessory for CT 26/36/48, or directly integrated for CT MINI I and MIDI I) and automatically starts the mobile dust extractor when switching on the TSC 55.

* For more information on Bluetooth® auto start, go to page 23

Large saw with depth.

The plunge-cut saw with 75 mm cutting depth.

Follows only one line. Accurate to the millimetre and without splinters. With the necessary force for each material – lightweight and easy to handle. The motor, with three bearings includes MMC electronics for an exceptional service life. The TS 75 combines considerable power in a compact device.

Plunge-cut saw TS 75

Precise plunge cuts in materials up to 75 mm thick.

Optimum cutting quality

For high-quality working results: The guide rail guarantees clean, splinter-free cuts. The TS 75 is fitted with guide jaws that do not require tools to be adjusted, in order to enable the saw to operate without any inaccuracy.

Safe and clean insertion

The spacer wedge is spring-loaded and slides back into the housing automatically when placed on the workpiece. Once the machine is inserted, the spacer wedge moves into the saw groove and prevents the saw blade from getting jammed. This means that the spacer wedge is always on the saw, ensuring safety at all times.

Even better cutting performance. Using systems.

As individual tools, they are already an attractive option; as a combined system, they are certain to amaze and impress. Whether with a guide rail, combination level, parallel side fence, multifunction table or effortless connection to a dust extractor, everything is compatible and optimises your work.

Versatility for wooden structures – even with a battery.

The portable circular saws with 55 mm cutting depth.

The compound mitre saw system for more independence combines precision and efficiency with a high level of user-friendliness, optimised ergonomics and ease of use. Features such as the cutting-depth adjustment with plunge cut function, hinged-cover remote control, guide wedge and FastFix saw blade change, for example, provide the best possible working conditions. And the FSK cross cutting guide rail produces precise cuts with repeat accuracy.

Portable circular saw HK 55

The cable variant. For rip and cross cuts in materials up to 55 mm thick. The high-torque 1200 W motor with power electronics ensures constant power when sawing.

Brushless
EC-TEC motor

Cordless circular saw HKC 55

Mobility and independence in any position with the brushless EC-TEC motor combined with a powerful 18 V lithium-ion battery for maximum cutting power. For rip and cross cuts in materials up to 55 mm thick.

Reproducible

Make cross cuts at accurate angles quickly anywhere with the FSK cross cutting guide rail.

Guide wedge for a high level of safety

The guide wedge enables unobstructed, stress-free and therefore safe sawing. As it is integrated into the spring-mounted pendulum hood, it is also possible to carry out plunge cuts in a safe and unobstructed way.

Pendulum hood remote control

To enable a clear view of the saw blade, the pendulum guard can be moved backwards from the front handle. This uncovers the saw blade and ensures your hands always remain at a safe distance from the saw blade.

Scribe mark = cut

Precision work, even for mitre cuts of up to 50°. When sawing in combination with the guide or cross cutting guide rail, the scribe line will always follow the cutting edge exactly, even when mitre cutting.

Reproducible. The FSK cross cutting guide rail.

Coupling the HK 55, HKC 55 and HK 85 with the FSK cross cutting guide rail, which is available in three lengths, is incredibly easy. In no time at all, you have a mobile, easy-to-handle compound mitre saw system for quick and accurately angled crosscuts.

The timber construction all-rounder.

The portable circular saw with 85 mm cutting depth.

Whether you are cutting solid timber, performing joining work, cutting planks, square timber or boards, sawing tenons or cutting panel materials of all types – the robust 2300-watt HK 85 ideally combines performance and ease of use with numerous equipment options and unique accessories. Cutting-depth adjustment with plunge cut function, hinged-cover remote control and guide wedge make the tool safe and convenient to use.

Portable circular saw HK 85

Powerful portable circular saw
with a cutting depth of 85 mm.

From portable circular saw to groove router

With the adjustable groove cutter conversion kit, the versatile HK 85 becomes a groove router for transverse and longitudinal grooves, making it a real all-rounder. For grooves with a width of 16 mm to 25 mm and a depth of up to 35 mm.

Scribe mark = cut

Precision work, even for mitre cuts of up to 60°. When sawing in combination with the guide or cross cutting guide rail, the scribe line will always follow the cutting edge exactly, even when mitre cutting.

The FS guide rail.

Safe and dead-straight machine guidance.

Connect comfortably

Two guide rails can be conveniently connected and aligned using the connecting piece.

No splinters

The rubber lip right at the scribe mark works as a splinter guard and prevents the edges from splintering even with angled cuts.

No slipping

The adhesive coating ensures that the rail remains stable. Different fixing options such as clamps and FS-Rapid quick-action clamps are available for a more secure grip.

The FSK cross cutting guide rail.

Fast, guided cross cuts at accurate angles.

Stop system

The fixed positioning bolt and the adjustable stop allow angled cuts from -60° to $+60^\circ$ to be made and repeated exactly. For simple work, the most common angle settings are locked into place in the rail.

Quick-acting closure

The circular saws can be connected to or disconnected from the cross cutting guide rail in an instant depending on whether you are sawing with guidance or freely by hand.

Retraction function

To ensure that it is always ready for use, the cross cutting guide rail has an adjustable stop and an integrated rubber spring that brings the saws back to their starting position.

Three machines in one.

The portable circular saw for carpentry.

The HK 132 is a versatile all-round tool. It impresses as a first-class circular saw with a cutting depth of 132 mm, and as first-class notch cutter or reliable flattening planer. When used together with the conversion kits, it is possible to switch from one function to another in next to no time. Together with the special sandwich saw blade, it is also suitable as a construction site saw for sawing sandwich panels.

Double the precision.

The KAPEX sliding compound mitre saws.

Two sliding compound mitre saws – one shared aim: The perfect cut. Compact, lightweight, unbeatable comfort and indescribable versatility. For precision results in workshop or assembly applications. With spherical bushings on both sides to offer a double layer of protection in terms of keeping the carriage precisely on course across extra-large columns.

Sliding compound mitre saw

KAPEX KS 120

With dual-line laser for precise marking, easily accessible precision adjustment to enable the saw blade angle to be set with millimetre accuracy and integrated extra mitre position for cutting depths up to a maximum of 120 mm.

Sliding compound mitre saw

KAPEX KS 88

88 mm cutting capacity with a compact, lightweight design.

Even greater comfort

The KS 120 features precision adjustment for setting the saw angle accurate to the millimetre. As with all important control elements, quick and convenient adjustment from the front of the machine.

Quality down to the finest detail

The KS 120 boasts a dual-line laser for accurately marking the saw cut.

Extra large dimensions with dual ball bearings

The Festool twin-column guide guarantees reliable, smooth guidance of the saw blade and represents maximum precision.

Static and transport frame in one

The base frame turns the KAPEX into a mobile unit that can be converted into a sawing station in three hand movements. With a trimming length of 2.40 m (including trimming attachment).

**Clever accessories:
Saves time and eliminates errors.**

The bevel for rapid measurement of interior and exterior corners and subsequent simple and precise transfer to the saw.

Mobility, versatility and best results – perfectly combined.

The KAPEX compact sliding compound mitre saw.

Dispenses with everything not needed for the job, such as any unnecessary weight. This device makes no compromises in terms of precision and versatility – with a mitre angle on both sides of up to 60 degrees and an inclination angle on both sides of up to 46 or 47 degrees. And a range of other clever details such as the LED spotlight, the pull-out extension table, the additional groove function and the bevel.

Sliding compound mitre saw
KAPEX KS 60

Unlimited mobility

With ergonomic carrying handles, cord holder and a transport safety device, in addition to an extremely compact, lightweight design thanks to flush-mounted guide rods.

Optimum visibility of the scribe mark

The LED spotlight (included in all SET versions) projects the shadow of the saw blade onto the material, highlighting precise cutting lines.

More mobile with the base frame

The underframe for the KS 60 is a stand and a transport frame in one – for even easier transportation of the KAPEX KS 60. It takes the KAPEX KS 60 up to a working height that is easier on the back and can be set up quickly and easily using a cleverly designed folding mechanism. The additional trimming attachment enables precise working with the extension arm up to a cutting length of 2.4 m.

Trimming strips could not be easier. The SYMMETRIC compound mitre saw.

Precision has never been simpler: Measure the angle, transfer it, always saw along the bisecting line without having to perform any calculations, and you're done. The SYMMETRIC SYM 70 lets you work considerably faster thanks to the symmetrical stop system. Making exterior angles up to 60° and interior angles up to 68° is easy.

Compound mitre saw
SYMMETRIC SYM 70

Technical data	SYM 70
Power consumption (watt)	1.150
Idle engine speed (RPM)	2.700 – 5.200
Saw blade diameter (mm)	216
Interior angle [°]	0 – 68
Exterior angle [°]	0 – 60
Max. strip height (mm)	70
Max. strip width (mm)	80
Dust extraction connection dia. (mm)	27/36
Weight (kg)	9,6

Sawing without the need for calculations

It really doesn't get much simpler – use the bevel to measure the angle from the wall or recess, transfer it over to the stop system and make the cut.

A firm grip

The stop jaws on the SYMMETRIC can be locked to prevent the set angle from changing while you work. Whether interior angles up to 68° or exterior angles up to 60°, everything stays in the right position.

Clever accessories

The additional feet raise the workbench of the SYM 70 to the exact height of a SYSTAINER SYS 1. It can then be used as a workbench to support long workpieces safely and securely.

Your fingers – invaluable!

NEW

No more severe cutting injuries – the new SawStop technology.

EuroTest-Preis 2019
für herausragende Leistungen im
Arbeits- und Gesundheitsschutz

The BG BAU awards the EuroTest prize for outstanding achievements in occupational health and safety to Festool again in 2019.

Drawing a line with a pencil. Unloading tools from your vehicle. Picking a screw up off the floor. How many of your fingers can you do without? In future, severe injuries when sawing will be a thing of the past. While you concentrate on your work, we will protect your most valuable tools – your fingers.

Online

Web-special for SawStop technology at
www.festool.com/sawstop

5000 casualties per year
20 injuries per workday
30% serious injuries*

The new SawStop technology keeps your fingers safe – meaning you won't lose any digits to count on.

Safe

The core component of the technology is a cartridge that drives an aluminium block into the saw blade at 500 N with the aid of a spring if it comes into contact with human skin during operation. The saw blade stops within five milliseconds and disappears from the hazardous area into the machine table. This prevents serious injuries from cuts.

Sophisticated

The intelligent electronics in the SawStop control system continuously monitor the operating condition of the complete system: Is the key inserted? Is a cartridge pretensioned? And is the saw blade also installed correctly? Is the distance between the aluminium block and saw blade correct?

Flexible

If you ever need to saw conductive material, the SawStop technology can be temporarily deactivated. However, you will need to keep an eye on your fingers!

Your fingers – invaluable!

The TKS 80 bench-mounted circular saws with SawStop technology.

Sawing is part and parcel of your everyday work. You place great emphasis on adhering to the highest levels of precision and producing the best cutting results. Even when it comes to larger workpieces, flawless quality is always on your mind. To help you meet these high standards, we have developed the perfect tool – the new TKS 80 bench-mounted circular saw. Its most important feature? Thanks to the intelligent SawStop technology, you no longer have to worry about your fingers. Your fingers are your most important tools, and we will ensure they are protected from cuts and injuries while you concentrate on your work.

Bench-mounted circular saw **TKS 80**

The sensitive sensors of the integrated SawStop technology ensure safe sawing.

Maximum precision

Fewer splinters on the upper surface of the material in mitre rip cuts by swivelling the saw blade to the left. More space for your hands and a clear view of the workpiece. Splinter-free cutting results on the underside of the material when using the splinter guard.

Flexible cutting height

Flexible cutting height up to 80 mm for larger cross cuts.

Bypass option

SawStop technology can, if necessary, be deactivated. This means that even conductive materials can be machined using the saw.

Comprehensive system accessories

Work surface can be extended in its length and width. Sliding table for cross-cutting up to 920 mm.

Precise cuts

Angle stop with locking positions and fine adjuster, can be used for cross cuts and rip cuts.

Healthy working in a system

Dust extraction attachment with CLEANTEC extraction sleeve ensures dust-free work and a free view of the workpiece.

Versatility made easy.

The PRECISIO trimming saws.

Cross or rip cuts. Mobile or stationary. Interior fitting, furniture-making or exhibition stand fitting. Diverse tasks, one solution: The PRECISIO CS 50 and CS 70 – lightweight and sophisticated functions.

Trimming saw **PRECISIO CS 50**

Cross cuts up to 300 mm wide at a 90° angle,
cross cuts up to 200 mm wide at a 45° angle
and with a cutting height of 52 mm.

Trimming saw **PRECISIO CS 70**

Cross cuts up to 320 mm wide at a 90° angle,
cross cuts up to 226 mm wide at a 45° angle
and with a cutting height of 70 mm.

Fast changeover from cross to rip cuts

The angle stop can be rotated by 180° and can be used easily on either side. The CS 50 can therefore be changed from the cross-cut to the rip-cut position in no time at all.

One handle for all functions

On/off switch, speed adjustment, quick start/stop functions and guiding mechanism – all of the most important control elements are integrated and clearly arranged in the multifunctional handle on the CS 50.

Mobile or stationary

Comprehensive system accessories allow you to upgrade the CS 70 to a complete sawing station with minimal effort, enabling you to make cross cuts on materials that exceed standard dimensions.

Quality cuts better.

Durability and precision under the toughest conditions. Adapted to the application and material. Made from high-quality steel with saw teeth made from fine-grain carbide. After all, you can only achieve a perfect cut when the saw blade is as good as the machine.

Colour code

Wood/Soft plastics

For hardwood, softwood, solid wood and building panels.

Plastics/Mineral materials

Fine-grain carbide guarantees perfect cuts in coated panels and mineral materials.

Aluminium

For aluminium profiles and panels.

Steel/Sandwich panels

The slightly chamfered teeth are suitable for sawing cable ducts or steel sheets and profiles.

Building materials

The material and teeth are designed specifically for working with abrasive materials.

Perfect adaptation

The saw blades are made of high-quality metal for perfect cuts and a long service life. Cutting angle and tooth shapes are adapted to the application and machine.

Long-term precision

A long service life and perfect cutting results come guaranteed thanks to the slow sanding action using diamond discs. Achieve flawless results without the need for major rework.

Simple selection

The practical colour coding system helps you quickly locate the correct saw blade for the specific application.

Minimum heat generation

Slow heating of the circular saw blades through laser-cut and thermally adjusted blade cores.

Rapid cutting progress

High-quality steel and optimised expansion slot for smooth, safe cutting progress.

Robust quality

Long useful life and excellent sharpening properties of saw teeth guarantee an excellent price/performance ratio.

Tooth shapes

Alternate top bevel saw blade (W/PW)

The teeth on this blade slope to the left and right and cut alternately. The alternate top bevel saw blade is a universal blade for all types of wood.

Flat trapezoidal tooth saw blade (TF)

With alternating trapezoidal and flat teeth, this blade is used for cutting aluminium, hard plastic and materials with hard coatings.

Flat tooth saw blade (F)

The edges of the teeth are straight, not slanted. Each tooth cuts in the same way. This tooth shape is used in saws for cutting steel and construction materials.

The sword saws.

Whether it is wood or insulating materials, the UNIVERS SSU 200 sword saw cuts all common materials in wooden structures. The IS 330 is the specialist for cutting insulating materials. It combines the advantages of a chainsaw and a portable circular saw in a unique mobile system. The guide rail ensures straight, splinter-free trimming, longitudinal, mitre and compound cutting with ease.

Tool-free chain changeover

Thanks to FastFix, the chain can be changed with just a few hand movements. The chain can also be tensioned without tools by turning the clamping wheel.

Work adapted to the material

The SSU 200 is equipped with MMC electronics: Material- and chainsaw-chain-specific speed control, smooth start-up, overload protection and quick-acting safety brake guarantee perfect results in all applications and are gentle on both the machine and the material.

The revolution in insulating-material saws.

The cordless insulating-material saw.

No matter whether freehand or guided with guide rail and stop system, whether working on roofing, scaffolding or flooring, with insulating material made of mineral fibres, natural fibres or PUR insulating boards – the ISC 240 impresses with its mobility, versatility and efficiency. With powerful 18 V Li-ion battery and brushless EC-TEC motor for cutting insulating materials at a cutting depth of up to 350 mm quickly and when on the go.

Versatile

For flexible insulating materials such as mineral wool and natural fibres with serrated cutting set, for insulating materials such as PUR and styrofoam with cross-set cutting set. In two lengths (240 mm/350 mm) for different material thicknesses.

Clean cutting surface

With the guide rail and angle stop (available in a set or as accessories), repeat cuts can be made perfectly straight and with precise angles.

Quick and durable

The cutting sets with special saw blades allow you to make rapid progress on your work with an extra-long service life, even with insulating materials up to 350 mm. Thanks to the quick-change system, the cutting set is replaced easily and without the need for tools in next to no time.

Sanding motions and strokes

Depending on the surface quality and desired result, different sanding motions can be selected for coarse or fine sanding. It is also true that the longer the sanding stroke, the more material is removed. A short sanding stroke of three millimetres, for example, is ideal for fine sanding; sanding strokes of five to seven millimetres remove a large amount of material for coarse sanding.

Linear

Eccentric

Eccentric rotation

Sanding motion

Pure linear movement in both directions.

Oscillating motion, which combines overlapping linear and circular motions.

Combined oscillating and free rotary motion.

Application

Ideal for sanding wood materials along the fibre orientation as well as on edges.

Can be deployed depending on the tool and sanding stroke from coarse to fine sanding. Less fine sanding finish than eccentric rotation, since sanding rings can remain visible.

Can be deployed depending on the tool and sanding stroke from coarse to fine sanding. Allows for a surface that is practically free of sanding rings and scratches thanks to a sanding process that leaves no traces.

Note

The linear sanding motion does not go out to the sides; linear sanders are therefore ideal for sanding profiles, rebates, handrails and frame sections adjacent to panes of glass.

The delta sander also has an oscillating motion; it is ideal for removing material on small surfaces with angles, corners and edges.

When sanding using an eccentric rotary motion, it makes no difference whether the machine is moved with or against the grain.

Forced eccentric rotation

Rotation

Band

<p>Forced eccentric rotation as a result of connection to a gear unit.</p>	<p>Pure rotary motion.</p>	<p>Pure linear movement in one direction through continuously rotating band.</p>
<p>Using the gear, the material removal capacity is significantly increased. Suitable for coarse sanding, for the quick removal of non-weight-bearing old coatings and for hologram-free polishing.</p>	<p>For the highest possible material removal capacity (e.g. when removing large areas of coating).</p>	<p>For a high rate of removal and grinding out large uneven surfaces.</p>
<p>Quick removal of large amounts of weathered layers of paint and varnish, without a high risk of sanding errors.</p>	<p>Powerful rotary sanders are not forgiving of any user errors; unintentionally deep sanding marks can be produced when working on workpieces that need to be completely level.</p>	<p>In combination with a sanding frame, the removal is limited so that a particularly level surface can be generated, even for veneered surfaces. Not suitable for wooden corner joints due to the differing grain directions.</p>

ROTEX – multifunctional legend.

The ROTEX geared eccentric sanders.

The unsurpassed original with 3-in-1 principle: With just a single tool for an extremely high material removal capacity in coarse sanding, a super-fine surface in fine sanding and a perfect finish in polishing. When combined with the GRANAT abrasive, the ROTEX saves money thanks to the minimal use of abrasives.

Geared eccentric sanders

ROTEX RO 90

Compact sander with 90 mm sanding pad diameter and unique 4-in-1 principle thanks to the delta sanding pad.

Geared eccentric sanders

ROTEX RO 125

Hand-held sander with 125 mm sanding pad diameter.

Geared eccentric sanders

ROTEX RO 150

Powerful sander with 150 mm sanding pad diameter and patented MULTI-JETSTREAM 2 principle.

Protects the sanding pad and workpiece

Sand safely against abutting edges without the risk of kickbacks with the Festool PROTECTOR.

Corners

A world first: The StickFix sanding pad transforms the ROTEX RO 90 into a triangle sander. Maximum material removal capacity on small surfaces with angles, corners and edges.

Healthy and dust-free thanks to the MULTI-JETSTREAM 2 principle

For maximum dust extraction with maximum sanding performance. Ensures a longer service life of abrasives, the sanding pad and the machine. Patented and the only one of its kind in the world for 150 mm diameters: The Festool MULTI-JETSTREAM 2 sanding system with supply air and exhaust air.

Changing pads without using tools

Simple, fast and safe. FastFix interface for changing sanding and polishing pads quickly without using tools. This means that you can respond to changing tasks and material requirements.

**The right abrasive.
For every application.**

And to ensure that you have a good overview of all your abrasives, Festool has the right Systainer for this. With inserts for the respective abrasive diameter.

The Systainers and other clever accessories can be found from page 92

The compact one-handed sanders – even with a battery.

The eccentric sanders.

Thanks to their low weight and their compact design, the eccentric sanders make it possible to perform sanding work above head height or on vertical surfaces for a long period without tiring. Whether powered by a battery or the mains power supply, both versions are especially powerful and boast a high material removal capacity. And you achieve the result you need quickly and gently thanks to the attachable protector and long-life chip collection bag.

Eccentric sander
ETS 125 R

The extra-lightweight cable variant.

Cordless eccentric sander
ETSC 125

The cordless version for limitless mobility. And also with an unlimited operating time thanks to the optional mains adapter.

Brushless
EC-TEC motor

With a particularly high material removal capacity

At 250 watts, the power of the ETS makes it stand out in its class and ensures rapid work progress.

**Work without interruptions**

Thanks to the Bluetooth® battery packs with 3.1 Ah capacity and a longer running time than charge time.

**Powerful and durable**

The powerful 18 V Bluetooth® Ergo battery pack in combination with the brushless EC-TEC motor ensures constant sanding and power similar to that of a mains-powered tool.

Unique: With battery or cable

For all applications which require an even longer operating performance, the 18 V Bluetooth® Ergo battery pack can be replaced with the plug it-mains adapter (included in the set and available as an accessory). This alone creates a mains-powered machine with an unlimited running time in combination with the plug it-cable – ideal in conjunction with a Festool mobile dust extractor.

Clean and dust-free. With chip collection bag or dust extraction.

Whether it is extracted via the reusable long-life chip collection bag or the Festool mobile dust extractor: With our system, you can stave off dust directly where it accrues. And, thanks to the Bluetooth® battery pack, you can control the mobile dust extractor directly with the cordless sander.

For more information about our mobile dust extractors, see page 158

Perfectly built for manual operation. The eccentric sanders with EC-TEC motor.

For reduced fatigue when carrying out overhead sanding work, a good feeling on edges and comfort when working in any position. The ETS EC compact class with ideal ergonomics provides different handle options that remain optimum at all times. The brushless EC-TEC motor and extremely high-quality components guarantee a long service life.

The difference between feeling and sensing

The "Vibration Control System" teaches the motor to think. Active regulation of the speed automatically reduces the operating performance when vibrations are too high. The result is smoother operation and a greatly improved feel when sanding with noticeably fewer vibrations.

Great results, without fail

Protects not just the workpiece but also the operator. The sanding pad brake, which is tipped with robust carbide, permanently prevents the sanding pad from revolving too quickly when it is in a no-load state and enables the tool to be applied to a surface without producing scratches and to be set down quickly.

Switched on and off by the operator – not by chance

The perfectly positioned push-button prevents the device from being switched on or off accidentally.

Improves your sanding experience because nothing drags

Redeveloped to provide optimum protection for your surfaces and significantly improved handling. The protective sleeve encasing the suction hose is made from 100% nylon, allowing it to glide gently over surfaces and edges. The integrated plug it-cable is also protected against damage.

Speedy finishing.

The powerful eccentric sanders.

Extremely quiet, perfect ergonomics, continuous speed adjustment, reliable sanding pad brake: Common features of these two eccentric sanders – for more comfort when working for prolonged periods.

Eccentric sander

ETS 150/3

ETS 150/5

150 mm diameter and available with two different strokes: ETS 150/3 with 3 mm sanding stroke for fine sanding and ETS 150/5 with 5 mm sanding stroke for intermediate sanding.

MULTI-JETSTREAM 2.

The MULTI-JETSTREAM 2 principle is defined by the unique interaction between intake air and exhaust air – with optimum dust extraction right up to the edge. An air flow is created which actively transports the sanding dust to the nearest extraction channel. The result: Virtually 100% dust extraction for a consistently high material removal rate, top surface quality and a healthy working environment.

Where speed and surface meet

The MMC electronics ensure that no-load speed is equal to operating speed.

With a particularly high material removal capacity

At 250 watts, the power of the RTS makes it stand out in its class and ensures rapid work progress.

Unique: With battery or cable

For all applications which require an even longer operating performance, the 18 V Bluetooth® Ergo battery pack can be replaced with the plug it-mains adapter (included in the set and available as an accessory). This alone creates a mains-powered machine with an unlimited running time in combination with the plug it-cable – ideal in conjunction with a Festool mobile dust extractor.

Work without interruptions

Thanks to the Bluetooth® battery packs with 3.1 Ah capacity and a longer running time than charge time.

Warranty all-inclusive. Your plus in performance.

Benefit from the comprehensive services provided by our all-inclusive warranty. When you register your new Festool tool, it is covered for the first years of use so you can concentrate on what really matters: your work.*

* Warranty all-inclusive is valid for all Festool tools registered within 30 days of purchase. The Festool warranty terms and conditions shall apply and are available at www.festool.com/service. The service offer may differ according to country and importer. The offer for "full repair, free of charge" does not apply for damage to consumables and accessories, misuse, damage caused by the use of non-original accessories or spare parts, nor in the case of tools which have been dismantled or subjected to constant, hard-wearing use. Wear parts are excluded.

The original from Festool.

The versatile RUTSCHER orbital sander range.

Invented in 1951 and consistently developed in terms of performance, ergonomic detail, efficiency and versatility. The RUTSCHER orbital sanders are perfect for sanding close to edges on three sides, achieving the best results on both small and large surfaces.

Orbital sander **RS 100 C**

Efficient over large surfaces: RS 100 C with added gear reduction. For consistently efficient material removal, perfect for sanding off stubborn coatings thanks to its 5 mm sanding stroke. The vibration stop ensures comfortably smooth running.

Orbital sander **RS 200**

Large surfaces finely sanded thanks to the 2.4 mm sanding stroke: Achieves excellent surface quality in intermediate sanding and final sanding of clear coats with a large sanding pad and high speed.

Orbital sander **RS 300**

Versatile: Various sanding pads and optimal ratio between size, weight and sanding pad – perfect for surfaces, corners, edges and cavities.

Unique: With battery or cable

For all applications which require an even longer operating performance, the 18 V Bluetooth® Ergo battery pack can be replaced with the plug it-mains adapter (included in the set and available as an accessory). This alone creates a mains-powered machine with an unlimited running time in combination with the plug it-cable – ideal in conjunction with a Festool mobile dust extractor.

For rebates, curves and profiles.

The DUPLEX linear sander.

The linear sanding movement of the LS 130 makes sanding by hand extremely comfortable and produces the perfect result considerably faster and with far less effort. The applications covered by the LS 130 include the most diverse profile, edge and window finishing. Particularly clever: The DIY construction kit for creating individual sanding pads for any profile.

Continuous precision.

The belt sanders.

Sanding wood along the grain with absolute precision: Coarse and fine tasks alike, these belt sanders are the perfect tools for the job when it comes to linear sanding. For best results in record time, without sanding rings and therefore no need for reworking.

Belt sander

BS 75

Universal for smaller surfaces: Perfect for sanding the surface of furniture, for example.

Belt sander

BS 105

Particularly fast when working on large surfaces: Perfect for sanding door cases, for example, or flat surfaces of a similar size.

Technical data	BS 75	BS 105
Power consumption (watt)	1.010	1.200
Belt speed, rated load (m/min)	200 – 380	230 – 380

Sanding area (mm)	135 x 75	160 x 105
Dust extraction connection dia. (mm)	27/36	27/36
Weight (kg)	4	6,3

Gentle positioning

Thanks to the sanding frame, the belt sander can be positioned gently and securely, does not tilt and is easy to guide.

Stationary use

With the bench unit, you can turn a mobile belt sander into a stationary unit in an instant, allowing you to machine smaller workpieces more efficiently.

Drywalling has never been so easy. The long-reach sanders.

With the Festool long-reach sanders, any room in drywall construction is quick and easy to prepare. The integrated dust extraction system, the removable brush segment for working close to edges and the ultra-soft sanding pad help you achieve the best results. Both PLANEX long-reach sanders are especially sturdy and long-lasting because they do not need a flexible shaft.

Long-reach sander **PLANEX easy LHS-E 225**

Unpack and go. Particularly simple to use without assembly or adjustment.

Brushless
EC-TEC motor

Long-reach sander **PLANEX LHS 225**

Makes working on walls and ceilings particularly simple thanks to variable working length and suction.

Best support.

The carrying harness provides ideal assistance for sanding ceilings up to 2.6 m, making prolonged, ergonomic and healthy work possible.

Sanding made easy

The machine's low weight and the advantageous weight distribution of the PLANEX long-reach sanders make work convenient.

Large cutting angle adjustment

The flexible joint provides you with a lot of room for movement. And the sanding pad lies completely flat and sands with maximum efficiency.

Systems get it done
The PLANEX mobile dust extractor.

The powerful CTM 36 AC PLANEX is precisely designed for the high material removal rate of the PLANEX long-reach sander. With a tool holder, kink-resistant hose and standard ComfortClean closing slide for even more effective filter cleaning. The result: Perfect results at maximum speed.

Excellence for coarse sanding.

RAS 180 rotary sander and RUSTOFIX brush machine.

Our specialists for the powerful machining of wooden surfaces. The powerful 1500-watt motor reliably provides a high traction and high material removal capacity in record time. And smooth start-up, controlled speed and a temperature control to protect against overload make them ideal for demanding, continuous use.

Brush machine **RUSTOFIX BMS 180**

04 Sanding with compressed air

122 LEX compressed air eccentric sander

124 RUTSCHER compressed air orbital sander

Designed for continuous operation.

The LEX compressed air eccentric sanders.

Extremely robust, durable and reliable. Ideal for continuous use because compressed air sanders are low-maintenance and lighter than power tools. Sturdy vane motors provide power, while the sophisticated IAS 3 system ensures perfect dust extraction and the vibration stop protects your health while you work.

Compressed air eccentric sander

LEX 3 77/2,5

Compact sander with 77 mm sanding pad diameter and weight of 800g. Perfect for sanding small or difficult-to-reach surfaces or edges.

Compressed air eccentric sander

LEX 3 125/3

LEX 3 125/5

125 mm diameter and available with two different strokes: LEX 3 125/3 with 3 mm sanding stroke for a high-quality sanding finish during fine and final sanding work and LEX 3 125/5 with 5 mm sanding stroke for making fast progress during coarse and intermediate sanding work.

Compressed air eccentric sander

LEX 3 150/3

LEX 3 150/5

LEX 3 150/7

150 mm diameter and available with three different strokes: LEX 3 150/3 with 3 mm sanding stroke for a high-quality sanding finish during fine and final sanding work, LEX 3 150/5 with 5 mm sanding stroke for making fast progress during coarse and intermediate sanding work and LEX 3 150/7 with 7 mm sanding stroke for removing a high volume of material in a very short time during coarse sanding work.

Maximum surface quality

The unique sanding pad brake prevents the sanding pad from turning upwards and prevents the surface being scratched during sanding, thereby minimising both reworking and costs.

Designed to fit your hand

Accurate guidance and precise sanding thanks to SoftGrip coating on the device. The well-balanced ergonomics also ensure effortless work.

Speed adjustment during sanding

The ergonomic position of the speed pre-selection enables infinite adjustment with the thumb, even during sanding.

Pad hardnesses for every application

Hard, soft, ultra-soft. Festool offers sanding pads with three different degrees of hardness for work that is optimally adapted to the material and surface.

**Three-fold benefits.
The Festool IAS 3 system.**

The IAS three-hose system combines three functions in a single hose: Compressed air supply, exhaust air extraction and dust extraction. Sanding dust and exhaust air are kept away from the work surface. Thanks to an intelligently designed exhaust air extraction system, no cold air escapes: Hands and wrists stay warm, work is more comfortable and better for health.

- 1 - Compressed air supply
- 2 - Exhaust air extraction
- 3 - Dust extraction

Sanding adapted to the material thanks to speed preselection.

The RUTSCHER compressed air orbital sanders.

Thanks to their low weight and ergonomic shape, the RUTSCHER compressed air orbital sanders fit perfectly in your hand. Both feature a vibration stop for healthy, effortless work. Their rectangular shape makes them ideal for flat surfaces.

RUTSCHER compressed air orbital sander

LRS 93

Weighing just 1.5 kg, particularly lightweight and compact.

RUTSCHER compressed air orbital sander

LRS 400

The long tool for large surfaces. While still being lightweight and handy.

Cost savings thanks to the durable MPE sanding pad

The MPE sanding pad is extremely durable. MPE has five times the tensile strength of sanding pads made from conventional foam rubbers and is therefore ideal for heavy-duty use.

148 Rotary polisher SHINEX

156 SURFIX oil dispenser

All-purpose genius.

The SHINEX rotary polisher.

With the comfortably positioned variable speed trigger, the SHINEX RAP 150 rotary polisher can be controlled at low speed and perfectly adapted to the polishing task at hand. The trigger is locked to ensure a consistent speed. The heat produced by the motor is continuously cooled via an integrated heat sink. This not only protects the bearings but is also effective in the grip area: The RAP 150 remains noticeably cool during prolonged use.

SHINEX RAP 150

Technical data	RAP 150-14	RAP 150-21
Power consumption (watt)	1.200	1.200
Idle engine speed (RPM)	600 – 1.400	900 – 2.100
Max. polishing pad dia. (mm)	150	150
Spindle	M14	M14
Weight (kg)	2,1	2,1

Compact and ergonomic

The RAP 150 weighs just 2.1 kg. Pleasant soft-grip material and the tool's slim design make for a secure hold in any position.

Close to the surface

The minimal distance from the pad to the machine allows more sensitive control when polishing, reducing the risk of the tool tipping over. The back of the housing functions as a secure rest point.

Oil application in its cleanest form.

The SURFIX oil dispenser.

The SURFIX oil dispenser makes oil application clean, fast and ergonomic – and significantly more economical than using a brush or cloth. The heavy-duty, one-step and outdoor oil types cover almost all internal and external applications – and are equally suited to light and dark woods.

We recommend putting your faith in dust extraction.

We strongly recommend to:

Make sure you choose the right extractor for the best possible dust extraction.

When working in a dusty environment or handling materials that generate large quantities of dust, your main priority should be protecting your health. How harmful the dust is to your health depends on the size of the particles as well as the quantity and time that the materials remain inside your lungs.

The smaller the dust particles are, the deeper they can penetrate into the lung tissue and this is why finer particles are much more harmful to the airways, with many being categorised as extremely hazardous to health.

In the interests of your own health, it is imperative that you keep the air clean when handling mineral dust that invariably contains quartziferous substances and always work with a certified and approved dust extractor or safety extractor.

Your Industrial Employers' Liability Insurance Association will provide you with detailed information and specially prepared lists of substances that exceed specified OEL (occupational exposure limits).

CTL SYS
CTL MINI/MIDI
CTL 26/36/48/48 EC

Specialists for dust with OEL > 1 mg/m³.

CTM 26/36/48/48 EC

Specialists for dust with OEL ≥ 0.1 mg/m³.
For quartziferous mineral dust and wood dust.

CTH 26/48

Specialists for dust with OEL < 0.1 mg/m³.
For carcinogenic and pathogenic dust, e.g. asbestos and mould.

CTL 48 LE EC/B 22
CTM 48 LE EC/B 22

Specialised in the extraction of flammable and explosive dust.

Dust categories in accordance with EN 60335-2-69, Appendix AA

	Appropriate	Max. permeability (test)	Disposal	Contamination risk
L (Low)	> Dust with OEL > 1 mg/m ³	1% (filter material)		
M (Medium)	> Dust with OEL ≥ 0.1 mg/m ³ > mineral dust > Wood dust	0.1% (complete tool incl. upholstery nail test)	Dust-free	Cap for transportation
H (High)	> Dust with OEL < 0.1 mg/m ³ > carcinogenic dust > Dust containing pathogens	0.005% (complete tool incl. upholstery nail test)	Dust-free	Cap for transportation

Full usage of space

The sophisticated container geometry, compatible SELFCLEAN filter bag and space-saving flat filter combine to produce a net volume that corresponds almost exactly to the gross volume of the container.

New and now even better: SYS DOCK

Simple transportation, better organisation and endless flexibility. The SYS-Dock with T-LOC for the safe connection of SYSTAINER, SORTAINER and SYS-ToolBox units.

Cable holder

The cable can be wound up quickly and neatly thanks to the new cord holder. And – thanks to the sophisticated folding mechanism – it can be easily removed from the holder without complex unwinding. Now also available with the CT MINI and MIDI compact extractors.

Hose garage

The integral hose holder eliminates the need for external hooks and protects the suction hose and mains cable from damage. The suction hose winds around the holder for clean, compact transportation.

Smooth suction hose with CLEANTEC sleeve

The new suction hose: Smooth and flexible – with a smooth exterior for perfect sliding over surfaces, a longer service life and greater suction power. The new CLEANTEC extraction sleeve ensures a secure fit on the tool.

AUTOCLEAN automatic main filter cleaning system

Less cleaning work and constant suction power. The AUTOCLEAN automatic cleaning system eliminates the need to clean the main filter manually. Individual cleaning intervals can be defined to guarantee powerful, constant suction.

Simply the best for dust-free work.

The best mobile tool for your health – the new CT MINI and MIDI compact extractors with new highlights: innovative touch operating concept, internal hose holder for the smooth suction hose, level storage area and manual dedusting with fast access to the main filter from the outside.

Approved for dust class M for the first time as CTM MIDI and equipped with suction hose detection for automatic adjustment to the right suction hose diameter.

Already integrated in the CT MINI and MIDI and simple to retrofit for the CT 26/36/48 mobile dust extractors: The innovative Bluetooth® technology that yields benefits when using cordless tools and for manual cleaning tasks.

Simply communicative: Extraction with Bluetooth® control.

Directly integrated or simple to retrofit

Directly integrated in the CT MINI and MIDI, simple to retrofit in the free slot on the CLEANTEC CT 26/36/48 mobile dust extractors*: The Bluetooth® module – and the mobile dust extractor can easily be controlled remotely straight away via the remote control on the suction hose or the Bluetooth® battery pack on the cordless tool.

Bluetooth® remote control

Saves you a trip to the extractor: For switching on the mobile dust extractor directly at the suction hose – even when the extractor is in AUTO mode. Ideal for occasional cleaning tasks.

Bluetooth® battery packs

For communication with the Bluetooth® module on the mobile dust extractor – and to make sure that even a cordless tool can start the mobile dust extractor automatically when switched on. Available as an accessory and automatically included with many Festool cordless products.

* Bluetooth® module available as an accessory.
Installation must be carried out by a qualified and certified electrician.

Spotless and space-saving. The extractor in SYSTAINER format.

The CLEANTEC CTL SYS is the ideal companion for fast and mobile use during relatively small fitting and servicing work: Very compact, lightweight and quiet, and can be coupled with a SYSTAINER system.

SYSTAINER extractor CTL SYS

Compatible with T-LOC in a SYSTAINER system for optimum workplace organisation.

Spotless, right down to the very last corner

The CTL SYS has an integrated crevice nozzle and upholstery nozzle always close to hand for a clean finish, even in hard-to-reach places.

Easy to transport in fewer trips

Thanks to the shoulder strap supplied with it, the CTL SYS is easy to carry, leaving your hands free for any other materials or tools you might need.

Mobile dust extractor

When combined with the SYS cart, the CTL SYS is provided with a set of wheels, allowing it to follow you with the cumulative suction power of the 1000 W turbine virtually every step of the way.

Simply flexible

Smooth, elastic and extremely robust. The smooth suction hose will win you over thanks to its improved handling and longer service life. It glides over every edge and possesses conical geometry for increased suction capacity.

Compact. Mobile. Sophisticated.

The CT MINI and CT MIDI mobile dust extractors.

Low weight, compact dimensions and a wealth of innovative details – the new CT MINI/MIDI compact dust extractors boast a comprehensive range of enticing features. With intuitive touch operation and a level storage area for tools and work materials, as well as an internal hose holder, Systainer T-LOC coupling and a practical cord holder for tidy and efficient working.

Mobile dust extractor **CLEANTEC CT MINI I**

10 l container capacity for class L dusts.

Mobile dust extractor **CLEANTEC CT MIDI I**

With automatic suction hose detection and 15 l container capacity for class L and M dusts.

Touch operation

Innovative and intuitive touch control panel instead of rotary knobs – extremely simple operation even when wearing gloves or in a dirty environment. When switched on, the extractor is automatically in automatic mode. The automatic switch-on for mains-operated and Bluetooth® cordless tools and Bluetooth® remote control is activated.

Filter replacement from outside

Quick, easy and tool-free.

Smooth suction hose

With conical geometry for improved suction power, smooth outer skin allow it to glide over all surfaces and edges perfectly.

Simply communicative. Integrated Bluetooth® technology

For automatically switching on the mobile dust extractor via remote control or the Bluetooth® battery pack. No retrofitting required. Perfect for working with Bluetooth® cordless tools.

The true size can be found inside. The all-round mobile dust extractors.

Compact yet effective. Lightweight yet powerful. Whether on the construction site or in the workshop – the generous container geometry of the CLEANTEC CT 26/36/48 offers a significantly larger capacity with compact dimensions. The extremely compact high-performance turbine supplies the appropriate suction power with a volume flow of 3900 l/min. With antistatic function to prevent build up of static charge when working.

Large capacity

The filter bag is free to unfold because of the flat filter and the smooth inner contours of the container. This allows the bag to be filled uniformly and a nearly 100% utilisation of the filter bag volume.

Simply flexible

Smooth, elastic and extremely robust. The smooth suction hose will win you over thanks to its improved handling and longer service life. It glides over every edge and possesses conical geometry for increased suction capacity.

Safe transport

Accessories and tools in the SYSTEMER, SORTAINER and SYS tool box can be quickly and easily connected to the extractor via the SYS dock thanks to the T-LOC system.

Optional extension

Depending on requirements, the extractor can be equipped with additional modules, such as the compressed air module, energy box module or Bluetooth® module.

Convenient and time-saving

The long-reach sander is securely attached to the tool holder. This enables abrasives to be changed quickly and conveniently or the range of the PLANEX to be extended with just a few hand movements. With a practical carry handle.

Maximum flexibility

Highly sensitive and non-buckling suction hose.

Heavy-duty tool.

The construction site extractor with automatic cleaning function.

When it comes to handling particularly large quantities of dust, which can accrue when working with tools such as masonry renovators and diamond grinders, the extractors from the AC HD family are in their element. Their extremely robust design with large wheels, steel axis and swivelling castor wheels ensures stability on every surface – while maintaining high mobility at the same time.

Mobile dust extractor **CLEANTEC CT 26 AC HD**

With 26 l container capacity for class L dusts.

Manual cleaning

Even heavily clogged filters can be cleaned: When the container inlet is closed manually with the ComfortClean sealing slide, a strong vacuum is generated, which cleans the filter with maximum force.

Flexible loading

Large storage and holding space for power tools and SYSTAINER.

No chance for hazardous dust.

The special extractors.

Hazardous dusts such as mould and asbestos, harmful wood preservatives, mineral fibre dust, lead, cadmium, nickel and zinc chromate are reliably extracted by the CLEANTEC CTH. The dust extractor with 99.995% filter collection efficiency is a specialist tool for extracting carcinogenic and pathogenic dusts.

Mobile dust extractor **CLEANTEC CTH 26**

26 l container capacity for class H dusts.

CTL 48 E LE EC	575300
CTM 48 E LE EC	575298

Mobile dust extractor CLEANTEC CT 48 EC/B22

To ensure maximum safety, the CT 48 EC/B22 special extractor conforms to the ATEX Directive 94/9/EC for zone 22. This means that dry, combustible dust on machines and tools is reliably extracted.

Technical data	CT 48 EC B22
Power consumption (watt)	150 – 1.100
Max. volume flow (l/min)	3.400
Max. vacuum (Pa)	23.000

CTM 48 E LE EC B22 R1	575286

Copes with high volumes of dust. Efficient, simple and reliable.

The pre-separator.

From now on, large quantities of dust and chips are not a problem any more – neither for the main filter nor for the suction power. Up to 80% of mineral dusts and up to 95% of large dusts such as sawing chips are separated and collected in the collecting vessel. This takes the strain off the main filter and guarantees consistently high suction power throughout the entire work process.

Pre-separator CT-VA

Copes with high levels of dust thanks to cyclone technology. Approved for dust classes L and M.

Technical data	CT-VA
Dimensions (L x W x H) (mm)	395 x 295 x 515
Max. container capacity (l)	20

When it comes to performance, size really isn't that important.

The extra-small cordless drill.

The compact cordless drill XS generates large amounts of torque and packs amazing power, even in awkward spots. With an extremely compact design and balanced weight distribution, it makes it possible to quickly perform work above head height or at an angle. The XS class is a versatile aid for demanding applications, whatever the circumstances.

In the ergonomic C model.

Cordless drill
TXS

In the classic T model.

Everything is close to hand in an instant

Keep your hands free at the right moment by conveniently attaching the machine to your belt: The belt clip is suitable for right- and left-handers, without the need for tools.

Amazingly powerful

The CXS can overcome any challenge with 10.8 V Lithium-ion battery packs. 12 available torque settings for controlled power.

Brains meet brawn.

The cordless drills from the C and T 18 class.

18-volt power on top form. The combination of lithium-ion battery packs and brushless EC-TEC motor makes it light, powerful and durable. The CENTROTEC quick-change system and the FastFix adapters ensure even faster work processes, while the fully electronic torque adjustment with memory switch function guarantees reproducible screwing.

EC-TEC motor

Cordless drill C 18

18-volt power in the ergonomic C model.

Top performance

Festool has combined EC-TEC motor technology with intelligent motor management and thereby developed it further considerably. The brushless EC-TEC motor is wear-free and converts the energy from the battery into power with virtually no losses. This means that the efficiency of C- and T-screwdrivers is enormous for their performance class. The electronic motor management also guarantees a longer service life: Microprocessors monitor and control the temperature, voltage and current consumption of the motor, electronics and battery.

Optimal lighting

The integrated LED light permits precise work even in dark corners.

The compact tools with powerful turning action.

The QUADRIVE cordless drills – with and without impact feature.

QUADRIVE. With four-speed metal gearbox. For transmitting extreme power and speeds: In this way, working with screws is both powerful and effortless with 60 Nm torque in first gear. And precise drilling is almost child's play with 3800 rpm in fourth gear. No matter whether you are working with wood or metal – the QUADRIVE series stands for high endurance and is tough enough for the job.

Cordless percussion drill **QUADRIVE PDC 18/4**

... with axial impact feature which can be activated for drilling into masonry and brickwork up to 10 mm.

EC-TEC

Brushless EC-TEC motor with integrated motor management for a long service life and maximum performance, marked by the tremendous impact energy of the QUADRIVE. Combined with the high-quality 18 V 5.2 Ah Li-ion AIRSTREAM battery packs, EC-TEC not only achieves maximum performance, but also maximum endurance.

Variety with just one click

Rapid change of attachments thanks to the FastFix interface without the need for any tools.

60 Nm in first gear

The QUADRIVE can insert even 10 x 300 mm screws effortlessly.

Make a show of power, not the Ah rating.

The Festool Li-ion 5.2 Ah battery pack with AIRSTREAM technology guarantees that battery packs can be reinserted quickly, allowing for seamless working – even for energy-intensive applications. This is because the battery packs have an integrated cooling duct, through which the cooling time and consequently the complete charging process is shortened by up to 65% in conjunction with the SCA 8 rapid charger.

Faster processes with the CENTROTEC quick-change system and the FastFix attachments – all without the need for additional equipment.

Angle attachment

Perfect for driving screws around corners and reaching concealed screws at tight angles.

Depth stop

For precise fittings with uniform screw depths.

Chuck

The standard width of up to 13 mm also enables the use of all standard bits and drill bits with cylindrical shank.

Eccentric adapter

For driving in screws close to edges.

CENTROTEC tool chuck

A chuck and bit holder in a single tool which is 50% smaller and 80% lighter than a standard chuck. And all this without compromising on quality; in fact, the opposite is true. The hexagon holder transfers force safely and prevents the drill bit from jamming and slipping. At the same time, this principle ensures high true-running precision. The CENTROTEC tool chuck can be fitted to all Festool cordless drills with a FastFix interface: For instant changes in the three-way balance between drilling, countersinking and screwdriving in assembly work.

The most powerful compact hammer drill

The BHC cordless hammer drill.

Developed according to its own laws: Ergonomically C-shaped and balanced weight distribution to guarantee effortless work. The combination of brushless EC-TEC drive and integrated motor management produces an extraordinarily high impact energy that can penetrate any concrete quickly and powerfully. The vibration damping absorbs impact energy before it is transferred to your hand.

Cordless hammer drill

BHC 18

Drilling holes with pneumatic impact action for dowels up to 18 mm in concrete, stone and masonry. Weighing only 2.6 kg and with excellent balance, it is ideally suited for continuous use for interior finishing and assembly.

Working with extraction

Dust-free, residue-free drilling with a secure hold: Thanks to the drill dust nozzle and the patented dual-chamber system, drilling holes up to a maximum diameter of 12 mm in floors, walls and ceilings is effortless. A flexible joint piece ensures the optimum hose position and the foam rubber pad provides a secure hold even on uneven surfaces.

Impact can be disabled

E.g. for drilling tiles.

Simply communicative

The 5.2 Ah Bluetooth® battery pack communicates with the Bluetooth® module on the CLEANTEC mobile dust extractor* and starts it automatically when the tool is switched on. In this way, you also benefit from the complete Festool dust-free system when working with the hammer drill in combination with the drill dust nozzle.

Power and durability for interior work.

The DURADRIVE cordless drywall screwdriver.

Works at extremely high cycle speeds and sets a new rhythm for dry mortarless construction. One important factor in this is the innovative stop-and-go function, which ensures the motor is only working when it is needed. The result: An increase of up to 40% in the number of screws that are inserted per battery charge, improved comfort and higher speeds for driving in multiple sets of screws. For speed which can be further increased by the magazine attachment.

Precision working

The depth stop can be attached without tools and adjusted in increments of 0.1 mm. This ensures that the screws are secure at consistent insertion depths. This eliminates the need for time-consuming reworking from the very beginning.

Lightweight

The compact version is even easier to handle: With the 400 g 3.1 Ah compact battery pack. Ideal for screw joints above head height.

High-torque.

The QUADRILL drill.

The QUADRILL DR 20 is the powerhouse for extreme drilling and screwdriving tasks: Ideal for drilling holes up to 20 mm in steel or 65 mm in wood and with a 98 Nm torque for screws up to 12x300 mm. The XL CENTROTEC and FastFix quick-change system ensure flexibility, while the angle chuck which can be adjusted for any working position provides maximum comfort while working.

09 Routing

220 Routers

225 Edge trimming system

225 Routing template

226 Worktop template

227 Hole series system

228 Jointing system

230 (Module) edge routers

233 Aluminium composite milling machine

234 Routing tools

Real all-rounders – in three performance classes. The routers.

Grooving, chamfering, rebating or contouring – anything is possible with these routers. Maximum precision thanks to adjustment of the routing depth accurate to 1/10 mm and MMC electronics for temperature monitoring and adaptation to the material you are working with. Complete safety thanks to the quick-acting brake which brings the routers to a stop within seconds.

Router OF 1010

Lightweight, compact router with 55 mm routing depth adjustment range and handle for safe one-handed and two-handed operation when routing edges, dovetail joints and circles.

Router OF 2200

The 2200-watt powerhouse with enormous torque and a large routing depth adjustment range of 80 mm. Can be used for solid hardwood door fittings or in staircase construction.

Router OF 1400

The all-rounder for routing. Power and ease of operation in perfect harmony. With its 70 mm routing depth adjustment range, it is the perfect machine for making recesses for fittings and for routing with templates.

Short set-up times

The ratchet principle on the OF 1400 and OF 2200 enables the copying ring to be changed without the need for additional equipment and the router to be replaced with ease.

The Festool cutters

Festool cutters allow you to tackle a wide range of applications safely and optimally. Machines, cutters and useful accessories – expertise from a single source.

Equipped for any task

The system accessories help you work more quickly. Starting with the multi-routing template, to the hole series guide rail, through to the VS 600 jointing system. They eliminate the need to spend time producing handmade routing templates.

99% dust extraction. Cleaner, healthier work.

The unique chip deflector ensures efficient dust extraction and guarantees maximum suction power when routing edges in combination with the dust extraction attachment and a Festool mobile dust extractor.

The edge experts.

The edge routers and module edge routers.

Edge routers provide the solution for an even, clean finish: Suitable for edge veneers, flush trimming, chamfering, rounding, contouring and cutting grooves. The compact design means that the handle position is located close to the router, therefore guaranteeing reliable guidance when working on straight and curved edges.

Laminate trimmer

OFK 500

With a lightweight design that is convenient and simple to use.

Module edge router

MFK 700

The universal edge router with exchangeable table – also suitable for routing grooves.

Laminate trimmer

OFK 700

The multi-talent for edge routing.

Module edge router

MFK 700 Basic

The specialist in edge routing – flush trimming and rounding off in a single step. Perfect in combination with the CONTURO edge bander.

Surface protection

The bench of the OFK 700 and the MFK 700 is inclined by 1.5° to protect the surface from damage. The slight inclination of the cutter prevents the surface from being milled off.

Large support surface

A large, precision-adjustable bench surface enables the MFK 700 to be optimally guided along the edge of the workpiece. Even when routing around corners, the machine does not tilt or route into the surface.

The finishing touch for the perfect edge

The MFK 700 EQ/B-Plus module edge router with special base for flush trimming edge veneers – even on edges cut at 45°. Thanks to the newly developed ball bearing brake with integrated chip deflector, it operates cleanly and efficiently without streaks.

Particularly compact

The OFK 500 works with an especially small spacing between the router and router table. The result: No routing mistakes, no slipping when working around corners and a better result on the whole.

Machine workpieces from all sides. The VAC SYS vacuum clamping system.

Machine workpieces from all sides in a single work step – with no need to reclamp. VAC SYS exemplifies simple, ergonomic, quick working.

Expertise in routing. The Festool cutters.

If you want to achieve guaranteed quality, compromise is out of the question. That is why we recommend original Festool routing accessories for all Festool routers. Produced with the same care as the tools. With cutting blades which impress with their micro-grain quality and density. And which ensure superb results and an excellent service life with their cutting edge geometry. Machines, routers and accessories – we provide optimum equipment from a single source for versatile and efficient working.

The right material for every application

HW Tungsten carbide
HW routers are ideally suited to processing hardwood, panel materials and plastic.

HS High performance, high speed steel
This steel has mechanical and thermal properties that are best suited for routing soft materials such as spruce and pine.

- GL** Total length (mm)
- NL** Effective length (mm)
- D** Cutter diameter (mm)
- s** Shank diameter (mm)
- alpha** Cutting angle (°)
- R** Radius (mm)
- V** Marking for minimum clamping length
- n max.** = maximum cutter speed
- HW** Tungsten carbide
- HS** High-speed steel

Tip: For optimum routing patterns, the routers should always be clamped at the lowest depth possible, and at least as far as the marking for minimum clamping length on the router shank.

Precision – even after sharpening.

When sharpening blunt edges on conventional cutters, the diameter aligned to the ball bearing guide normally decreases. This causes a ridge to form when edges are trimmed flush after the bit is sharpened. The turning plate slot cutter and ball bearing guide maintain a high level of precision.

3 different cutter spindles are available for use of the disc groove cutter from 1.5 mm to 5 mm groove width.

Cutter spindle 1 has a fixed shaft, which is not suitable as a thrust surface (fire hazard). Therefore, this cutter spindle is only intended for work with a side stop.

Cutter spindle 2 is equipped with a 16 mm ball bearing (above the disc slot), which serves as a thrust surface. With this cutter spindle, a groove depth of 12 mm results from the use of the 40 mm disc slot.

Cutter spindle 3 is equipped with a 28 mm ball bearing (above the disc slot), which serves as a thrust surface. With this cutter spindle, a groove depth of 6 mm results from the use of the 40 mm disc slot.

Precise and durable.

Mineral materials are very demanding on the cutting blade. When working with the ball bearing guide, it is absolutely vital that the cutter and ball bearing guide are permanently aligned. This is why tools with reversible blades pay dividends within a very short time.

Ball bearing guide D21,1/6° for router 6°, Diameter 21,1 mm	493061
Ball bearing guide D12,7 Alpha 6°, Diameter 12,7 mm	491398

Simply ingenious.

If the cutting blade is not aligned with the ball bearing guide exactly after sharpening, the joint to the cutter blade can be readjusted by moving the axial ball bearing guide, extending the service life of your Festool basin cutters even longer.

More precise joints.

The DOMINO joining machines.

Unique among manual machines and patented by Festool: The DOMINO DF 500 jointer routing motion. The simultaneous rotating and pendulum movement of the router allows smooth working and holes without scorch marks. Thanks to the pendulum motion, the routers do not overheat, leading to an extremely long tool life.

Joining machine DF 500 Q-Plus

The DOMINO DF 500 is particularly easy to handle and offers almost unlimited jointing possibilities. No matter whether it is panel or cabinet construction, for lightweight frame or rack joints – the DF 500 impresses with maximum precision, flexibility and simple handling.

Joining machine DF 700 EQ-Plus

Comes to the workpiece and not vice versa: DOMINO XL. Quick, simple, precise and extremely stable – with measurably shorter tooling times and up to 50% time-saving in comparison to stationary machines. The DOMINO XL is therefore ideally suited for furniture and door construction and solid wood joints.

Innovative stop system

One of the main time-based advantages of working with the DOMINO joiner arises from working without complicated measuring or marking. With the DOMINO DF 500, the fast and precise positioning is quite simple thanks to the stop catches; with the DF 700 this is enabled by stop pins.

Long-hole principle

Custom-fit alignment: The first DOMINO is positioned in a precision cut elongated hole, the next DOMINOs are inserted into wider elongated holes with play so that the joint can be aligned effortlessly. The result is a stable joint, protected against rotation from the first DOMINO.

Routing height and angle setting

Time-saving and precise adjustment of the routing height and angle: For precise mitre routing and processing various material thicknesses. Using presettings or infinite routing angle adjustment.

Save time when using the same cutting depth over and over again

You select your required routing depth using the detent lever lock on the DF 500. The options are 12 mm, 15 mm, 20 mm, 25 mm and 28 mm. On the DF 700, you can use the variable routing depth setting to select between 15–70 mm and set two freely selectable "flag" positions.

The right solution for every combination. The DOMINO system.

Create robust joints quickly and simply with the DOMINO connectors – and loosen them again when required. Perfect for corner and surface joints, and now also for centre panel joints and joints between series of holes. The cover caps in various colours provide the perfect finishing touch.

Perfect connections made easy. The DOMINO family at a glance.

Every wooden joint has its advantages. The **DOMINO** jointing system combines them all.

DOMINO dowels made from beech and sipo

Beechwood DOMINOS bear the Pan European Forest Council (PEFC) quality seal for wood products originating from sustainable, well-maintained, responsible forest cultivation.

DOMINO dowels made from sipo are resistant to weather, insects and mould, making them ideal for outdoor applications.

11 Planing

270 EHL 65 one-hand electronic planer

272 HL 850 electronic planer

Modified slightly. Improved decisively.

The one-hand electronic planer.

Weighing just 2.4 kg and with a compact design, the EHL 65 electric planer is not only the lightest one-handed planer in its class, but also the most powerful. With a 4 mm planing and 23 mm rebate depth and excellent surface finish thanks to the unique spiral blade with pulling cut. With SoftGrip handle, single-button operation and non-slip ridges on the housing for a secure hold. In short: The one-handed planer for professionals.

One-hand electronic planer
EHL 65

Technical data	EHL 65
Power consumption (watt)	720
Planer shaft speed (RPM)	15.600
Planing width (mm)	65
Planing depth (mm)	0 – 4
Max. rebate depth (mm)	23
Dust extraction connection dia. (mm)	27
Weight (kg)	2,4

Nothing quieter

The EHL 65 is significantly quieter than other planers. In fact, it is so quiet that it makes less noise under load than other planers do when idling. This is an important contribution to safety while working. Yet another benefit of the special shape of the spiral blade.

Stepless cutting depth adjustment

The infinitely adjustable cutting depth is a valuable feature in practice. You can use the rotating handle to accurately adjust the cutting depth, while carrying out your work.

Planer with no limits.

Our electronic planer.

Planing and producing rebates close to the edge: Thanks to the single-bearing planing head, the HL 850 electronic planer produces flush results with an unlimited rebate depth. No limit to the rebate depth, no rework required.

Electric planers HL 850

Technical data	HL 850

Texturing surfaces

Narrow, wide or rustic waves. Replacing the planing head for textured planing requires a single hand movement.

Accurate chamfering

No slipping or running off course: The 90° V-groove in the planer foot makes the HL 850 electric planer feel like it is gliding along a rail when chamfering boards and beams.

276 CONTURO edge bander

278 Trimming machine

279 Multifunction table

279 Adapter plate

The start of the perfect edge.

The CONTURO edge bander.

Versatile and easy to operate, the CONTURO represents a genuine solution for manufacturing narrow or large workpieces and individual shaped parts, as well as affixing edging to workpieces or furniture components produced in small batches.

Edge bander **CONTURO KA 65**

For classic furniture edging or manufacturing of complex moulded parts with convex or concave curves. For finishes in wood, melamine or plastic. For variable edge heights of up to 65 mm and material thicknesses of up to 3 mm.

Edge trimming set

KA 65 Set

From the trimming machine and spot repair scraper, through to abrasives and polishes – everything is sorted and clear to see in the SYSTAINER "Edge trimming set".

Low heating

Device housing does not heat up, ensuring safety while working.

Unique cartridge gluing system

Easy, clean and efficient work as well as quick colour changes thanks to the unique cartridge gluing system. The glue is only ever melted as required, avoiding coagulation, discolouration and deterioration.

For an even wider range of applications

Four different adhesive colours (white, natural, brown and black) guarantee the perfect join quality, whatever your decor. And with the new polyurethane adhesive, waterproof and heat-resistant gluing (for example for bathroom and kitchen furnishings) is now easy.

Always ready to use

Nozzle system that is easy to clean. Self-contained system that prevents the unwanted escape of glue.

The perfect edge finish. The MFK 700 Basic.

The final sanding process comes after the gluing and edge trimming: Cut off edge protrusion, smooth down the edge, perform finishing work on corners and polish the edge if necessary to high gloss. Ideal for routing edges: The Festool MFK 700 Basic edge router with spring-loaded ball bearing guide brake and chip deflector. This is designed specially for machining the most delicate edges without leaving behind any marks.

MFT/3 CONTURO

This stationary working method is very practical for straight edges along small or narrow workpieces that are difficult to clamp. The edge is inserted in the usual way, the workpiece is then guided along the rail while even pressure is applied to the contact roller.

The CONTURO as a stationary machine

Not only can you affix edging to straight edges or curves, but also oblique edges with an angle of 90°–45° because the CONTURO can be tilted 90°–45° in the stationary unit.

Adapter plate

AP-KA 65

For stationary use of the edge bander. Installation of the adapter plate in a self-constructed table frame or in the MFT perforated top intended for it. For small batches, straight edges, freeform elements and gluing inclined edges, angle of 0–47°.

Robust, ergonomic, powerful.

The compact stirrers.

Extremely ergonomic. The discomfort of mixing while bent over is now a thing of the past: The MX stirrers can be adjusted to your height thanks to ErgoFix height adjustment. You work upright, protect your back and can completely rely on the powerful motors, which ensure intensive and quick mixing.

Stirrer **MX 1000**

The universal one-gear stirrer with 1020 watts for mixing applications up to 40 l.

Stirrer **MX 1000/2**

The two-gear specialist with 1020 watts for mixing applications up to 40 l. The second gear is a high-speed gear for mixing even more quickly and easily.

Stirrer **MX 1200**

The single-speed powerhouse with 1200 watts for mixing applications up to 60 l.

Ergonomic – mix while standing upright

Simply adjust your stirrer to match your height with the patented ErgoFix height adjustment system. Mix in a natural upright working position for relaxed and effortless working.

Extremely sturdy design

The stirrers can withstand the toughest of conditions, from heavy contamination to hard impact or collisions, thanks to their durable drive, switch guard and rubber edges.

Controlled power thanks to the variable speed trigger and speed control

The easy-to-use variable speed trigger is fitted with a rubber cap to protect it from dirt. The tool delivers controlled power and increases speed gradually to prevent material from spraying out during start-up. The separate speed adjusting wheel can be used to set the appropriate speed level for every mixing application.

Lightning-quick changes without using tools

The FastFix quick-change system allows the machine and stirrer basket to be separated without the use of tools and enables rapid replacement of the stirrer basket, as well as simple cleaning and space-saving transportation.

One for all. The ErgoFix adapter.

The ErgoFix adapter has a classic M14 holder that is compatible with all standard stirrer baskets. In addition, thanks to its patented height adjustment system, it can be adjusted to suit the body height of the operator.

Extremely powerful for harsh industrial environments.

The powerful stirrers for large quantities.

The MX 1200/2 and MX 1600/2 stirrers can withstand the toughest of conditions, from heavy contamination to hard impact or collisions. The even more powerful motors and high-torque two-speed gearbox are perfect for major, heavy-duty mixing applications: First gear for viscous and heavy materials, second gear for simple and fast mixing of liquid materials.

Stirrer
MX 1200/2

The high-torque two-speed stirrer with 1200 watts for mixing applications up to 70 l.

Stirrer
MX 1600/2

Our most powerful two-speed stirrer with 1500 watts for mixing applications up to 90 l.

All within easy reach

A tubular steel frame ensures maximum robustness and parallel rubber-coated handles enable the user to guide the machine with ease and comfort.

Faster. Lighter. More intensive.

The two-spindle stirrer.

For up to 50% more speed, the DUO stirrer works with two spindles working in opposite directions: The two stirring rods interlock, thereby speeding up the mixing of the material. Perfect mixing results with considerably less exertion for the user.

Stirrer MX 1600/2 DUO

Two-speed DUO stirrer with 1500 watts for thorough mixing, even of viscous and multi-component material up to 90 l.

Work more easily

Working with the DUO saves even more energy. The stirring rods working in opposite directions cancel out the torque. You guide the tool through the material with virtually no torque.

Lightning-quick changes without using tools

The FastFix quick-change system allows the machine and stirrer basket to be separated without the use of tools and enables rapid replacement of the stirrer basket, as well as simple cleaning and space-saving transportation.

Right up to the wall

The segment can be folded back without using tools, enabling work to be carried out close to the edges. A wall stop and diamond disc (recessed by 0.5 mm) prevent any possibility of damage to the wall and edges.

Precise grinding depth

The guide table with dust extraction attachment for accurate height adjustment ensures the exact setting of the grinding depth.

Adjustable speed

The speed can be adjusted comfortably on the handle, allowing both hard and soft materials to be removed perfectly.

Brush ring for improved dust extraction

The brush ring automatically adapts to uneven surfaces and reacts fluently to changes in the segment height. This means there are no longer any gaps left between the material and the brush ring, and the suction power is always excellent.

Replaceable diamond discs.
Always adapted to the working material.

Whether you are working with concrete, screed, paint, adhesive or other coatings: The DIA HARD, ABRASIVE, STONE, THERMO and PAINT diamond discs can handle it all. And any disc can be swapped out for another in just a few simple steps.

The optimal solution for material removal during renovation and restoration.

The RENOFIX renovation millers.

Fast working with powerful electronics for constant speed. With the RENOFIX renovation millers, thanks to the wide range of accessories, both hard and soft materials can be removed.

Renovation miller **RENOFIX RG 80**

One for all. The RENOFIX RG 80 renovation miller is a multi-talent for small to medium-sized surfaces.

Renovation miller **RENOFIX RG 150**

The RG 150 renovation miller with a 150 mm tool diameter and a broad range of accessories guarantees fast progress on large surfaces.

Technical data	RG 80	RG 150

Work adapted to the material

For precise, dust-free work on porous substrates, a speed adapted to the material is key. The speed of the RENOFIX renovation millers can therefore be controlled electronically.

Compact, handy, ergonomic

The slimline motor housing, the additional hand grip, the dome grip above the transmission housing and the stable extraction pipe of the RG 80 enable individual handling options – for comfortable hand positions in every working situation.

302 Cordless angle grinder

304 Freehand diamond cutting systems

306 Diamond cutting systems

The robust solution for cutting and grinding.

The cordless angle grinder.

The AGC 18 cordless angle grinder is dust-resistant and extremely durable thanks to the enclosed brushless EC-TEC motor and protected electronics. Its continuous adjustable speed from 4500 to 8500 rpm allows for cutting and grinding that is suitable for any material.

Technical data	AGC 18
Battery voltage (V)	18
Idle engine speed (RPM)	4.500 – 8.500
Disc dia. (mm)	125
Spindle thread/flange	M14
Li-ion battery capacity (Ah)	5,2
Weight with Li-ion (kg)	2,7

Impressively ergonomic

The design is logically set out for optimal operation in cutting work. For especially smooth operation and fewer vibrations, the motor and housing can be disconnected.

All-inclusive safety while working

Soft start-up, electronic overload protection, motor brake and restart protection ensure safe work.

Accurate separating cuts without dust – even with a battery.

The freehand diamond cutting systems.

To safeguard health when working, the dust extraction attachment for freehand cutting systems transports over 95% of the dust directly into the mobile dust extractor – making it ideal for dust-free cutting work on mineral materials in interiors. The open design allows a clear view of the cutting line for easy orientation on the scribe mark.

Precise cutting without dust. The diamond cutting systems.

Gone are the days when cutting and grinding work was a dusty affair. The hazardous dust is now extracted reliably, the health of the user is protected and a free view of the workpiece guaranteed. A combination of compatible machines, accessories and consumables provides the perfect solution for efficient, perfect and accurate working progress.

Diamond cutting system **DSC-AG 125**

For clean and precise working with a cutting depth of up to 27 mm.

Diamond cutting system **DSC-AG 230**

Cuts powerfully through mineral construction materials up to 63 mm thick.

Technical data	DSC-AG 125	DSC-AG 230
Power consumption (watt)	1.400	2.600
Idle engine speed (RPM)	3.500 – 11.000	6.500
Disc dia. (mm)	125	230
Side clearance (mm)	32	35
Front clearance (mm)	78	85
Cutting depth without/with guide rail (mm)	27/23	63/59
Dust extraction connection dia. (mm)	36/27	36/27
Weight of cover/system (kg)	2,2/4,1	3,2/8,9

More precise cutting

The DSC-AG 125 and the DSC-AG 230 can be used on the Festool guide rail and therefore open up new applications. This makes cutting materials of any size simple and precise.

Simply insert

The integrated plunge-cut function makes it possible to start cutting anywhere in the material. Simply insert at the point where the material is damaged and cut to the pre-selected cutting depth.

16 Illuminating

312 SYSLITE UNI working light

312 SYSLITE KAL II working light

312 DUO working light

312 SYSLITE STL 450
surface control light

See everything. Work with more precision.

The right light for every situation.

Whether you choose the SYSLITE DUO or SYSLITE KAL working lights, the handy SYSLITE UNI or the SYSLITE STL 450 surface inspection light – all are designed to simplify your work. They provide excellent lighting for every situation – from small surfaces through to entire rooms. Because high-quality lighting is essential for good work.

Torch

SYSLITE UNI

Small and compact for ultimate mobility. Compatible with all Festool battery packs.

Working light

SYSLITE DUO

Extensive illumination (mains-powered) of entire rooms with light quality that replicates daylight. Can be used in a wide variety of ways: Stands alone, is attached to a Festool tripod or, if preferred, is hung on a hook using the suspension means on the rear.

Working light

SYSLITE KAL II

Turns dark surfaces into work surfaces in an extremely versatile manner. Can be positioned or suspended in five positions and powered by a wide variety of sources (internal battery, battery pack, mains cable or car charger).

Grazing light

SYSLITE STL 450

The inspection light optimally focuses the light – ideal for inspecting surfaces even when working. Variable height and inclination with compatible tripod and long cable for a large range of applications.

NEW

The new Systainer³ generation allows for more mobile working than ever. Festool, Tanos and bott have collaboratively developed a mobility system that can be perfectly integrated into bott vehicle equipment. This allows you to safely deploy the familiar arrangement and simple handling that you are used to from the Systainer system in your vehicle as well.

Thanks to the special holder, Systainer³ units can be integrated directly into bott vehicle equipment.

Simply tidier, more clearly arranged and better organised.

Whatever your everyday working life brings – thanks to the exceptional compatibility of the Systainer system, you are optimally equipped for every task. All Systainer generations can be combined with one another and can also be combined with mobile dust extractors and many other system accessories, such as the roll board or the mobile workshop. Additionally, in the Systainer³, machines, accessories and consumables are reliably protected from dust, splashes of water and impacts.

The Systainer³ can always be open with no need to decouple it.

Organisation has never been easier. In the Systainer³ Organiser, small parts can be individually and clearly organised.

Festool creates new innovations – and new standards. From 2020, we will gradually be converting our entire portfolio to the Systainer³ system.

All information on this can be found at any time on www.festool.com/mobility

Protection zone

A mobile phone can be connected to the internal socket, for example, where it will be securely protected against dust and contamination. The integrated thermal overload protection provides additional safety.

Turns the construction site into your workshop.

The mobile workshop.

The workshop that you can take with you – for ideal working conditions even on the construction site. Effortless transportation between workshop, vehicle and construction site is ensured by its low weight, compact dimensions and good mobility on stairs. It is immediately ready for on-site use, with no need for time-consuming assembly.

For efficient work processes. The mobile organisation centre.

The best way to organise your workspace: In a single tool, you can store all your machinery, accessories and even mobile dust extractors, and have these immediately on hand and ready to use. And if you ever need to switch workstations within the workshop, our centre can quite easily be transported to the new location along with you.

Universalcenter UCR 1000

Set consisting of MFH 1000 multifunction stool and WCR 1000 Workcenter.

Workcenter WCR 1000

The Workcenter can not only be connected to the multifunction stool, but also with all Festool mobile dust extractors with T-LOC. Moreover, it offers a large storage area for SYSTAINER units and a number of hooks for accessories and machines.

Toolcenter TC 3000/2

Can be used flexibly while still offering ample space to work. Additionally, Systainers up to SYS3 M 237 can be stowed in the lockable compartment.

Multifunction stool MFH 1000

The multifunction stool not only serves as a stable and comfortable seat, but is also the basis for the WCR 1000 Workcenter.

Impeccable guidance.

The guide rails.

Invented and perfected by Festool: The guide rail. For cuts and grooves that impress thanks to their precision. With a slideway lining for the smooth running of the machines, a groove for the fastening and lever clamps or the splinterguard for splinter-free sawing.

guide rails FS/2

The guide rail is available in 8 different lengths, from 800 mm to 5000 mm.

Guide rails with rows of holes FS/2 LR 32

The hole line distance of 32 mm allows for quick and precise milling of hole lines in furniture manufacturing.

A third hand

In many cases replaces the assistant when it comes to having a free hand for marking, clamping, gripping, etc.

The future of clamping.

The VAC SYS vacuum clamping system.

Dynamic holding force, gentle on the surface: With the VAC SYS vacuum clamping system, workpieces can be machined on all sides in a single step, without laborious re-clamping and without leaving a mark. From the surface all the way to the edge. And with radii that cover a 360° rotation and a cutting angle adjustment of up to 90°. This produces a brand new level of freedom and the optimum preconditions for healthy and ergonomic work.

Vacuum clamping system **VAC SYS**

Not only the pad but also the clamping unit itself harnesses the power of the vacuum that is generated to secure the unit to the work bench. Screws or clamps can be used as an alternative.

Technical data	VAC SYS
Power consumption at 50 Hz (watt)	160 – 200
Power consumption at 60 Hz (watt)	200 – 230
Pump capacity at 50 Hz (m³/h)	2,7

Pads replaced without using tools

There are four pad sizes for different workpieces to choose from and they can be replaced quickly with FastFix.

Twice as powerful

For especially large, heavy and curved workpieces, a second clamping unit can be connected to the VAC SYS pump.

May be combined with the MFT 3

You can connect the VAC SYS to the MFT 3 multifunction table by using an adapter plate and simply fold the VAC SYS down when it is not in use.

For greater ease of movement. The energy box and the boom arm.

Extended action radius and central control: Thanks to the energy box EAA and the boom arm ASA. They hold tools within easy reach, supply energy and extract automatically. For increased mobility and efficiency when working.

Boom arm

ASA 5000 ASA 6000

A large application area with an extended working radius of 39–84 m² and extreme manoeuvrability is guaranteed by the double-jointed technology of the ASA 5000/6000.

Energy box EAA

The EAA can be mounted on a ceiling, wall or boom arm. In doing so, two power tools or pneumatic tools can be mounted directly on the housing at the same time.

Workplace changes made easy

Boom arms are primarily used in locations where workplaces need to be flexible or where a larger operating radius is required. Power and dust extraction is supplied where it is needed, while avoiding tripping hazards. This saves you time moving equipment and creates more space in the workshop.

Manually adjustable

Adjustment of the slide valve provides suction power wherever an electric and/or air tool is in operation.

Plug it.

One cable for all devices.

The plug it-system is not only much more practical, quicker and convenient but also more economical. In the event of a cable break (a frequent cause of electric power tool failure) downtimes are reduced because the cables on Festool tools are not integrated into the interior of the machine: you simply plug in another cable and carry on working! This means no costly repairs, and minimal downtimes. Needless to say, a plug it-connector can be retrofitted to tools that do not already have one.

General notes on the catalogue:

01 Remember to use appropriate protective devices or wear personal protective equipment when using Festool products such as compressed air and electric power tools together with their accessories and consumable materials or when machining hazardous materials. For further information, please refer to the relevant safety documentation or consult our customer service if you have questions.

02 Machine specifications included in the catalogue, such as quantity specifications, time savings, coverage capacities, etc., are average values and may deviate significantly, depending on the material being processed. The manufacturer does not guarantee that the values will be achieved in each individual case. Your Festool specialist dealer will be glad to answer any queries you may have concerning this matter.

03 The machine weights that are specified in the catalogue usually refer to the weight of a machine ready for use including a standard insertion tool, but without a cable, accessories or consumables. Please note that the weights stated may deviate from the specifications in the catalogue, depending on the insertion tool, battery pack, accessories or other additional parts used.

04 All trademark rights, patent rights and other commercial property rights mentioned in this catalogue remain the property of the relevant beneficiary, even in cases where this is not explicitly stated. The reproduction in particular of common names, trade names, goods designations, etc. in this catalogue (even if not identified as such) does not render these names exempt from trademark or brand protection legislation and does not therefore authorise anyone to use them.

05 We reserve the right to make modifications, especially to technical data or specifications, without prior notification. Individual features may vary depending on country-specific conditions.

06 Products may differ from those shown and the images may at times present components or parts that are not included as standard with the tools. If you have any questions, please contact your Festool specialist retailer.

07 Safety: All power tools and compressed air tools listed in this catalogue conform to the valid and applicable IEC or EN safety standards, depending on the type of tool (e.g. IEC/EN 61 029, IEC/EN 60 745, IEC/EN 62 841, IEC/EN 60 335, EN ISO 11 148, IEC/CISPR/EN 55 014, IEC/EN 61 000).

08 CE conformity: All power tools and compressed air tools listed in this catalogue comply with the provisions of the relevant applicable EU directives (e.g. Machinery Directive 2006/42/EC, Low Voltage Directive 2014/35/EU, EMC Directive 2014/30/EU, RoHS Directive 2011/65/EU, Directive on the provision of radio equipment 2014/53/EU, Directive on equipment and protective systems intended for use in potentially explosive atmospheres 2014/34/EU).

09 ISO certification: All the power tools and compressed air tools listed in this catalogue are manufactured in our production plants which are certified in accordance with DIN EN ISO 9001 certified.
